FOREWORD

The National Curriculum Framework (NCF), 2005, recommends that children's life at school must be linked to their life outside the school. This principle marks a departure from the legacy of bookish learning which continues to shape our system and causes a gap between the school, home and community. The syllabi and textbooks developed on the basis of NCF signify an attempt to implement this basic idea. They also attempt to discourage rote learning and the maintenance of sharp boundaries between different subject areas. We hope these measures will take us significantly further in the direction of a child-centred system of education outlined in the *National Policy on Education 1986*.

The success of this effort depends on the steps that school principals and teachers will take to encourage children to reflect on their own learning and to pursue imaginative activities and questions. We must recognise that, given space, time and freedom, children generate new knowledge by engaging with the information passed on to them by adults. Treating the prescribed textbook as the sole basis of examination is one of the key reasons why other resources and sites of learning are ignored. Inculcating creativity and initiative is possible if we perceive and treat children as participants in learning, not as receivers of a fixed body of knowledge.

These aims imply considerable change in school routines and mode of functioning. Flexibility in the daily time-table is as necessary as rigour in implementing the annual calendar so that the required number of teaching days are actually devoted to teaching. The methods used for teaching and evaluation will also determine how effective this textbook proves for making children's life at school a happy experience, rather than a source of stress or boredom. Syllabus designers have tried to address the problem of curricular burden by restructuring and reorienting knowledge at different stages with greater consideration for child psychology and the time available for teaching. The textbook attempts to enhance this endeavour by giving higher priority and space to opportunities for contemplation and wondering, discussion in small groups, and activities requiring hands-on experience.

The National Council of Educational Research and Training (NCERT) appreciates the hard work done by the textbook development committee

responsible for this book. We wish to thank the Chairperson of the advisory group in Social Sciences Professor Hari Vasudevan and the Chief Advisor for this book, Professor R.K. Grover, (Retd.) Director, School of Management Studies (IGNOU), New Delhi for guiding the work of this committee. Several teachers contributed to the development of this textbook; we are grateful to their principals for making this possible. We are indebted to the institutions and organisations which have generously permitted us to draw upon their resources, material and personnel. We are especially grateful to the members of the National Monitoring Committee, appointed by the Department of Secondary and Higher Education, Ministry of Human Resource Development under the Chairpersonship of Professor Mrinal Miri and Professor G.P. Deshpande, for their valuable time and contribution. As an organisation committed to the systemic reform and continuous improvement in the quality of its products, NCERT welcomes comments and suggestions which will enable us to undertake further revision and refinement.

New Delhi 20 December 2005 Director National Council of Educational Research and Training

RATIONALISATION OF CONTENT IN THE TEXTBOOKS

In view of the COVID-19 pandemic, it is imperative to reduce content load on students. The National Education Policy 2020, also emphasises reducing the content load and providing opportunities for experiential learning with creative mindset. In this background, the NCERT has undertaken the exercise to rationalise the textbooks across all classes. Learning Outcomes already developed by the NCERT across classes have been taken into consideration in this exercise.

Contents of the textbooks have been rationalised in view of the following:

- Overlapping with similar content included in other subject areas in the same class
- Similar content included in the lower or higher class in the same subject
- Difficulty level
- Content, which is easily accessible to students without much interventions from teachers and can be learned by children through self-learning or peer-learning
- Content, which is irrelevant in the present context

This present edition, is a reformatted version after carrying out the changes given above.

ot to be republication of the period

ACKNOWLEDGEMENTS

The National Council of Educational Research and Training acknowledges the valuable contributions of the Textbook Development Committee which took considerable pains in the development and review of manuscript as well.

Special thanks are due to Savita Sinha, *Professor* and *Head*, Department of Education in Social Sciences, NCERT for her support, during the development of this book. We also acknowledge the contribution of all teachers of Commerce who developed the extra learning material for QR codes in the textbook.

The Council acknowledges the contribustion of Anil Deswal, *Post Graduate Teacher* of Commerce at Rajkiya Pratibha Vikas Vidyalaya, Rohini, New Delhi for the review and updation of this textbook. The efforts of DESS, Administration is acknowleged for the preparation of manuscript, and Publication Division of NCERT is acknowledged for printing this textbook.

Financial Statements - I

LEARNING OBJECTIVES

After studying this chapter, you will be able to :

- state the nature of the financial statements;
- identify the various stakeholders and their information requirements;
- distinguish between the capital and revenue expenditure and receipts;
- explain the concept of trading and profit and loss account and its preparation;
- State the nature of gross profit, net profit and operating profit;
- describe the concept of balance sheet and its preparation;
- explain grouping and marshalling of assets and liabilities;
- prepare profit and loss account and balance sheet of a sole proprietory firm; and
- make an opening entry.

You have learnt that financial accounting is a well-defined sequential activity which begins with Journal (Journalising), Ledger (Posting), and preparation of Trial Balance (Balancing and Summarisation at the first stage). In the present chapter, we will take up the next step, namely, preparation of financial statements, and discuss the types of information requirements of various stakeholders, the distinction between capital and revenue items and its importance and the nature of financial statements and the preparation thereof.

8.1 Stakeholders and their Information Requirements

Recall from chapter I (Financial Accounting Part I) that the objective of business is to communicate the meaningful information to various stakeholders in the business so that they can make informed decisions. A stakeholder is any person associated with the business. The stakes of various stakeholders can be monetary or non-monetary. The stakes can be active or passive; or can be direct or indirect. The owner and persons advancing loan to the business would have monetary stake. The government, consumer or a researcher will have non-monetary stake in the business. The stakeholders are also called users who are normally classified as internal and *external* depending upon whether they are inside the business or outside the business. All users have different objectives for joining business and

consequently different types of information requirements from it. In nutshell, the various users have diverse financial information requirements from the business.

For example we have classified the following into the category of internal and external users specifying their objectives and consequent information requirements.

Name	Internal/ External users	<i>Objective for participating in business</i>	Accounting Information requirements
Current owners	Internal	To make investment in the business and wealth grow.	Likes to know extent of profit in the last accounting period, current position of the assets/liabilities of the business.
Manager and	Internal	For a career. They essenti- ally act as the agent of owners (their employers).	Accounting information in the form of financial statements is like their report card and they are interested in information about both profits financial position.
Government	External	Its role is regulatory and tries to lay down the rules in the best public interest.	Its concerns are that the rights of all stakeholders are protected. Since the government levies taxes on the business, they are interested in information about profitability in particular besides lot of other information.
Prospective owner	External	He is expecting to make investments in the business with a view to make his investment and wealth grow.	He is interested in information about past profits and financial position as indicative of likely future performance.
Bank	External	Bank is interested in safety of the principal as well as the periodic return (interest).	Bank is interested in adequacy of profits only as an assurance of the return of principal and interest back in time. Bank is equally concerned about the form in which the assets are held by the business. When more assets are held in cash or near cash form, the aspect is knnown as liquidity.

Fig. 8.1 : Analysis of various users of accounting information

Box 1

Accounting Process (up to Trial balance) :

- 1. Identify the transactions, which that are recorded.
- 2. Record transactions in journal. Only those transactions are recorded which are measured in money terms. The system followed for recording is called double entry system whereby two aspects (debit and credit) of every transaction are recorded. Repeated transactions of same nature are recorded in subsidiary books, also called special journals. Instead of recording all transactions in journal, they are recorded in subsidiary books and the journal proper. For example, the business would record all credit sales in sales book and all credit purchases in purchases book. The other examples of subsidiary books are return inwards book, return outwards book. An other important special book is cash book, in which all cash and bank transactions are recorded in a residual journal called *journal proper*.
- 3. The entries appearing in the above books are posted in the respective accounts in the ledger.
- 4. The accounts are balanced and listed in a statement called *trial balance*. If the total amounts of debit and credit balances agree, accounts are taken as free from arithmetical errors.
- 5. The trial balance forms the basis for making the financial statements, i.e. trading and profit and loss account and balance sheet.

8.2 Distinction between Capital and Revenue

A very important distinction in accounting is between capital and revenue items. The distinction has important implications for making of the trading and profit and loss account and balance sheet. The revenue items form part of the trading and profit and loss account, the capital items help in the preparation of a balance sheet.

8.2.1 Expenditure

Whenever payment and/or incurrence of an outlay are made for a purpose other than the settlement of an existing liability, it is called expenditure. The expenditures are incurred with a viewpoint they would give benefits to the business. The benefit of an expenditure may extend up to one accounting year or more than one year. If the benefit of expenditure extends up to one accounting period, it is termed as *revenue expenditure*. Normally, they are incurred for the day-to-day conduct of the business. An example can be payment of salaries, rent, etc. The salaries paid in the current period will not benefit the business in the next accounting period, as the workers have put in their efforts in the current accounting period. They will have to be paid the salaries in the next accounting period as well if they are made to work. If the benefit of expenditure extends more than one accounting period, it is termed as *capital expenditure*. An example can be payment to acquire furniture for use in the business. Furniture acquired in the current accounting period will give benefits for many accounting periods to come. The usual examples of capital expenditure can be payment to acquire fixed assets and/or to make additions/ extensions in the fixed assets.

Following points of distinction between capital expenditure and revenue expenditure are worth noting :

- (a) Capital expenditure increases earning capacity of business whereas revenue expenditure is incurred to maintain the earning capacity.
- (b) Capital expenditure is incurred to acquire fixed assets for operation of business whereas revenue expenditure is incurred on day-to-day conduct of business.
- (c) Revenue expenditure is generally recurring expenditure and capital expenditure is non-recurring by nature.
- (d) Capital expenditure benefits more than one accounting year whereas revenue expenditure normally benefits one accounting year.
- (e) Capital expenditure (subject to depreciation) is recorded in balance sheet whereas revenue expenditure (subject to adjustment for outstanding and prepaid amount) is transferred to trading and profit and loss account.

Sometimes, it becomes difficult to classify the expenditure into revenue or capital category. In normal usage, the advertising expenditure is termed as revenue expenditure. The heavy expenditure incurred on advertising is likely to benefit the business firm for more than one accounting period. Such revenue expenditures, which are likely to give benefit for more than one accounting period, are termed as *deferred revenue expenditure*.

It must be understood that expenditure is a wider term and includes expenses. Expenditure is any outlay made/incurred by the business firm. The part of the expenditure, which is perceived to have been used or consumed in the current year, is termed as expense of the current year.

Revenue expenditure is treated as an expense for the current year and is shown in trading and profit and loss account. For example, salary paid by the business firm is treated as an expense of the current year. Capital expenditures are charged to income statement and are spread over to more than one accounting period. Hence, furniture of ₹ 50,000 if expected to be used for 5 years will be treated as expense @ ₹ 10,000 per year. The name given for the expense is depreciation. The treatment of deferred revenue expenditure is same as of capital expenditure. They are also written-off over their expected period of benefit.

8.2.2 Receipts

The similar treatment is given to the receipts of the business. If the receipts imply an obligation to return the money, these are capital receipts. The example can be an additional capital brought in by the owner or a loan taken from the bank. Both receipts are leading to obligations, the first to the owner (called equity) and the other to the outsiders (called liabilities). Another example on a capital receipt can be the sale of a fixed asset like old machinery or furniture. However, if a receipt does not incur an obligation to return the money or is not in the form of a sale of fixed asset, it is termed as revenue receipt. The examples of revenue receipts sales made by the firm and interest on investment received by the firm.

8.2.3 Importance of Distinction between Capital and Revenue

As stated earlier, the distinction between capital and revenue items has important implications for the preparation of trading and profit and loss account and the balance sheet as all items of revenue value are to the shown in the trading and profit and loss account and the items of capital nature in the balance sheet. If any item is wrongly classified, i.e. if any item of revenue nature is treated as capital item or vice-versa, the ascertainment of profit or loss will be incorrect. For example, the revenues earned during an accounting period are ₹ 10,00,000 and the expenses shown are ₹ 8,00,000, the profit shall work out as ₹ 2,00,000. On scrutiny of the details, you find that a revenue item of ₹ 20,000 (an expenditure on repairs of machinery) has been treated as capital expenditure (added to the cost of machinery and debited to machinery account, not to repairs account), and hence, does not form part of the expenses for the period. It means the actual expenses for the period are ₹ 8.20,000 and not ₹ 8,00,000. So, the correct profit is ₹ 1,80,000, not ₹ 2,00,000. In other words, the profit has been over stated. Similarly, if any capital expenditure is wrongly shown as revenue expenditure (for example, purchase of furniture shown as purchases), it will result in under statement of profits, and also an under statement of assets. Thus, the financial statements will not reflect the true and fair view of the affairs of the business. Hence, it is necessary to identify the correct nature of each item and treat it accordingly in the book of accounts. It is also important from taxation point of view because capital profits are taxed differently from revenue profits.

8.3 Financial Statements

It has been emphasised that various users have diverse informational requirements. Instead of generating particular information useful for specific users, the business prepares a set of financial statements, which in general satisfies the informational needs of the users. The basic objectives of preparing financial statements are :

- (a) To present a true and fair view of the financial performance of the business;
- (b) To present a true and fair view of the financial position of the business; and

For this purpose, the firm usually prepares the following financial statements:

- 1. Trading and Profit and Loss Account
- 2. Balance Sheet¹

Trading and Profit and Loss account, also known as Income statement, shows the financial performance in the form of profit earned or loss sustained by the business. Balance Sheet shows financial position in the form of assets, liabilities and capital. These are prepared on the basis of trial balance and additional information, if any.

Example 1

Observe the following trial balance of Ankit and signify correctly the various elements of accounts and you will notice that the debit balances represent either assets or expenses/ losses and the credit balance represent either equity/liabilities or revenue/gains.

[This trial balance of Ankit will be used throughout the chapter to understand the process of preparation of financial statements]

Account Title	L.F.	Debit Amount ₹	Credit Amount ₹
Cash		1,000	
Capital			12,000
Bank		5,000	
Sales			1,25,000
Wages		8,000	
Creditors			15,000
Salaries		25,000	
10% Long term loan (raised on April 01, 2016)			5,000
Furniture		15,000	
Commission received			5,000
Rent of building		13,000	
Debtors		15,500	
Bad debts		4,500	
Purchases		75,000	
		1,62,000	1,62,000

Trial Balance of Ankit as on March 31, 2017

¹ The balance sheet and profit and loss account are now called position statement and statement of profit and loss in the company's financial statements. Since Chapters 8 and 9 deal with the preparation of financial statements of sole proprietorship firm, the terms balance sheet and profit and loss account are retained.

Account Title	Elements	L.F.	Debit	Credit
		Ar	nountAmount	
			₹	₹
Cash	Asset		1,000

			1,62,000	1,62,000

Analysis of Tria	Balance	of Ankit as on	March 31, 2017
------------------	---------	----------------	----------------

8.4 Trading and Profit and Loss Account

Trading and Profit and Loss account is prepared to determine the profit earned or loss sustained by the business enterprise during the accounting period. It is basically a summary of revenues and expenses of the business and calculates the net figure termed as profit or loss. Profit is revenue *less* expenses. If expenses are more than revenues, the figure is termed as *loss*. Trading and Profit and Loss account summarises the performance for an accounting period. It is achieved by transferring the balances of revenues and expenses to the trading and profit and loss account from the trial balance. Trading and Profit and Loss account is also an account with *Debit and Credit* sides. It can be observed that debit balances (representing expenses) and losses are transferred to the debit side of the Trading and a Profit and Loss account and credit balance (representing revenues/gains) are transfered to its credit side.

8.4.1 Relevant Items in Trading and Profit and Loss Account

The different items appearing in the trading and profit and loss account are explained hereunder:

Items on the debit side

(i) *Opening stock* : It is the stock of goods in hand at the beginning of the accounting year. This is the stock of goods which has been carried

forward from the previous year and remains unchanged during the year and appears in the trial balance. In the trading account it appears on the debit side because it forms the part of cost of goods sold for the current accounting year.

- (ii) Purchases less returns: Goods, which have been bought for resale appears as purchases on the debit side of the trading account. They include both cash as well as credit purchases. Goods which are returned to suppliers are termed as purchases return. It is shown by way of deduction from purchases and the computed amount is known as Net purchases.
- (iii) *Wages* : Wages refer to renumeration paid to workers who are directly engaged in factory for loading, unloading and production of goods and are debited to trading account.
- (iv) *Carriage inwards/Freight inwards:* These expenses are the items of transport expenses, which are incurred on bringing materials/goods purchased to the place of business. These items are paid in respect of purchases made during the year and are debited to the trading account.
- (v) *Fuel/Water/Power/Gas*: These items are used in the production process and hence are part of expenses.
- (vi) *Packaging material and Packing charges*: Cost of packaging material used in the product are direct expenses as it refers to small containers which form part of goods sold. However, the packing refers to the big containers that are used for transporting the goods and is regarded as an indirect expense debited to profit and loss account.
- (vii) *Salaries* : These include salaries paid to the administration, godown and warehouse staff for the services rendered by them for running the business. If salaries are paid in kind by providing certain facilities (called perks) to the employees such as rent free accommodation, meals, uniform, medical facilities should also be regarded as salaries and debited to the profit and loss account.
- (viii) *Rent paid* : These include office and godown rent, municipal rates and taxes, factory rent, rates and taxes. The amount of rent paid is shown on the debit side of the profit and loss account.
 - (ix) *Interest paid* : Interest paid on loans, bank overdraft, renewal of bills of exchange, etc. is an expense and is debited to profit and loss account.
 - (x) *Commission paid:* Commission paid or payable on business transactions undertaken through the agents is an item of expense and is debited to profit and loss account.

Financial Statements - I

- (xi) *Repairs*: Repairs and small renewals/ replacements relating to plant and machinery, furniture, fixtures, fittings, etc. for keeping them in working condition are included under this head. Such expenditure is debited to profit and loss account.
- (xii) *Miscellaneous expenses* : Though expenses are classified and booked under different heads, but certain expenses being of small amount clubbed together and are called miscellaneous expenses. In normal usage these expenses are called *Sundry expenses* or *Trade expenses*.

Items on the credit side

- (i) Sales less returns : Sales account in trial balance shows gross total sales(cash as well as credit) made during the year. It is shown on the credit side of the trading account. Goods returned by customers are called return inwards and are shown as deduction from total sales and the computed amount is known as net sales.
- (ii) *Other incomes* : Besides salaries and other gains and incomes are also recorded in the profit and loss account. Examples of such incomes are rent received, dividend received, interest received, discount received, commission received, etc.

8.4.2 Closing Entries

The preparation of trading and profit and loss account requires that the balances of accounts of all concerned items are transferred to it for its compilation.

• Opening stock account, Purchases account, Wages account, Carriage inwards account and direct expenses account are closed by transferring to the debit side of the trading and profit and loss account.

This is done by recording the following entry :

Trading A/c To Opening stock A/c To Purchases A/c To Wages A/c To Carriage inwards A/c To All other direct expenses A/c

• The purchases returns or return outwards are closed by transferring its balance to the purchases account. The following entry is recorded for this purpose :

Purchases return A/c To Purchases A/c Dr.

Dr.

As result of the foregoing discussion, we will now learn how the trading and profit and loss account can be prepared from the trial balance, the format of which is shown in figure 8.2. However, this list is not exhaustive. In real sense, there can be many more of other items, which we will be dealing at the later stage and there you will notice how this format undergoes a change with respect to each one of them.

^{1,2}*either of the items computed*

8.4.3 Concept of Gross Profit and Net Profit

The trading and profit and loss can be seen as combination of two accounts, viz. Trading account and Profit and Loss account. The trading account or the first part ascertains the *gross profit* and profit and loss account or the second part ascertains *net profit*.

Trading Account

The trading account ascertains the result from basic operational activities of the business. The basic operational activity involves the manufacturing, purchasing and selling of goods. It is prepared to ascertain whether the selling

Dr.

of goods and/or rendering of services to customers have proved profitable for the business or not. Purchases is one of the main constituents of expenses in business organisation. Besides purchases, the remaining expenses are divided into two categories, viz. *direct expenses and indirect* expenses.

Direct expenses means all expenses directly connected with the manufacture, purchase of goods and bringing them to the point of sale. Direct expenses include carriage inwards, freight inwards, wages, factory lighting, coal, water and feul, royalty on production, etc. In our example-1, besides purchases, four more items of expenses are listed. These are wages, salaries, rent of building and bad debts. Out of these items, wages is treated as *direct expense* while the other three are treated as *indirect expenses*.

Similarly, *sales* constitute the main item of revenue for the business. The excess of sales over purchases and direct expenses is called *gross profit*. If the amount of purchases including direct expenses is more than the sales revenue, the resultant figure is *gross loss*. The computation of gross profit can be shown in the form of equation as :

Gross Profit = Sales - (Purchases + Direct Expenses)

The gross profit or the gross loss is transferred to profit and loss account.

The *indirect expenses* are transferred to the debit side of the second part, viz. profit and loss account. All revenue/gains other than *sales* are transferred to the credit side of the profit and loss account. If the total of the credit side of the profit and loss account is more than the total of the debit side, the difference is the *net profit* for the period of which it is being prepared. On the other hand, if the total of the debit side is more than the total of the credit side, the difference is the *net loss* incurred by the business firm. In an equation form, it is shown as follows :

Net Profit = Gross Profit + Other Incomes – Indirect Expenses Net profit or net loss so computed is transferred to the capital account in the balance sheet by way of the following entry :

(i)	For transfer of net profit	
	Profit and Loss A/c	Dr.
	To Capital A/c	
(ii)	For transfer of net loss	
	Capital A/c	Dr.
	To Profit and Loss A/c	

We are now redrafting the trading and profit and loss account to show gross profit and net profit of Ankit for the year ended March 31, 2017. The redrafted trading and profit and loss account will look like as shown is shown in figure 8.3.

Dr.			Cr.
Expenses/Losses	Amount	Revenues/Gains	Amount

Trading and Profit and Loss Account of Ankit for the year ended March 31, 2017

Cr

Cr.

Fig. 8.3 : Showing the computation of gross profit and net profit of Ankit

Gross profit, which represents the basic operational activity of the business is computed as ₹ 42,000. The gross profit is transferred from trading account to profit and loss account. Besides gross profit, business has earned an income of ₹ 5,000 as commission received and has spent ₹ 42,500 (₹ 25,000 + ₹13,000 + ₹4,500) on expenses/losses including salaries, rent and bad debts. Therefore, the net profit is calculated as ₹ 4,500.

Test Your Understanding - I

I State True or False :

- (i) Gross profit is total revenue.
- (ii) In trading and profit and loss account, opening stock appears on the debit side because it forms the part of the cost of sales for the current accounting year.
- (iii) Rent, rates and taxes is an example of direct expenses.
- (iv) If the total of the credit side of the profit and loss account is more than the total of the debit side, the difference is the net profit.

II Match the items given under 'A' with the correct items under 'B'

- (i) Closing stock is credited to
- (ii) Accuracy of book of account is tested by
- (iii) On returning the goods to seller, the buyer sends
- (iv) The financial position is determined by
- (v) On receiving the returned goods from the buyer, the seller sends
- (a) Trial balance
- (b) Trading account
- (c) Credit note
- (d) Balance sheet
- (e) Debit note

8.4.4 Cost of Goods Sold and Closing Stock-Trading Account Revisited

The trading and profit and loss account prepared in figure 8.3 presents useful information as to the profitability from the basic operations of the business enterprise. It is reproduced for further perusal.

Trading Account of Ankit for the year ended March 31, 2017

Dr.			Cr.
Expenses/Losses	Amount ₹	Revenues/Gains	Amount ₹
Purchases Wages Gross profit	75,000 8,000 42,000	Sales	1,25,000
	1,25,000		1,25,000

Fig. 8.4 : An illutrative trading account of Ankit

If there is no opening or closing stock, the total of purchases and direct expenses is taken as *Cost of goods sold*. In our example, notice that purchases amount to ₹ 75,000 and wages amounts to ₹ 8,000. Hence, the cost of goods sold will be computed using the following formula :

As there is no unsold stock, the presumption here is that all the goods purchased have been sold. But in practice, there is some unsold goods at the end of the accounting period.

In our example, let us assume that out of the goods purchased amounting to ₹75,000 in the current year, Ankit is able to sell goods costing ₹60,000 only. In such a situation, the business will have an unsold stock of goods costing ₹15,000 in hand, also called closing stock. The amount of cost of goods sold will be computed as per the following equation :

Cost of Goods Sold = Purchases + Direct Expenses - Closing Stock = ₹ 75,000 + ₹ 8,000 - ₹ 15,000

As a result, the amount of gross profit will also change with the existence of closing stock in business from ₹ 42,000 (as computed in figure 8.4) to ₹ 57,000 (refer figure 8.5).

Expenses/Losses	Amount ₹	Revenues/Gains	Amount ₹
Purchases Wages Gross profit c/d	75,000 8,000 57,000	Sales Closing stock	1,25,000 15,000

Financial Statements - I

It may be noted that closing stock does not normally form part of trial balance, and is brought into books with the help of the following journal entry :

Closing stock A/c Dr. To Trading A/c

This entry opens a new account of asset, i.e. closing stock ₹ 15,000 which is transferred to the balance sheet. The closing stock shall be an opening stock for the next year and shall be sold during the year. In most cases, therefore, the business shall have opening stock as well as closing stock every year, and the cost of goods sold should be worked as per the following equation:

Cost of Goods Sold = Opening Stock+Purchases Direct Expenses–Closing Stock

Look at Illustration 5 and see how it has been computed.

Illustration 5

Compute cost of goods sold for the year 2017 with the help of the following information and prepare trading account

Sales	20, 00,000
Purchases	15, 00,000
Wages	1,00,000
Stock (Apr. 01, 2016)	3, 00,000

8.5 Operating Profit (EBIT)

It is the profit earned through the normal operations and activities of the business. Operating profit is the excess of operating revenue over operating expenses. While calculating operating profit, the incomes and expenses of a purely financial nature are not taken into account. Thus, operating profit is profit before interest and tax (EBIT). Similarly, abnormal items such as loss by fire, etc. are also not taken into account. It is calculated as follows:

Operating profit = Net Profit + Non Operating Expenses - Non Operating Incomes

Refer to the trial balance of Ankit in example 1 (Page no. 294), you will notice that it depicts an item relating to 10% interest on long-term loan raised on April 01, 2017. The amount of interest works out to ₹ 500 (₹ 5,000 × 10/100), which has been shown on the debit side of the trading and profit and loss account (figure 8.6).

Expenses/Losses	Amount ₹	Revenues/Gains	Amount ₹

Cr.

Fig. 8.6 : Showing the treatment of interest on profit

The operating profit will be :

Operating profit = Net profit + Non-operating expenses – Non-operating incomes Operating profit = ₹ 19,000+ 500 – nil = ₹ 19,500

Test Your Understanding - II		
Choose the correct option in the following questions :		
1. The financial statements consist of:		
(i) Trial balance		
(ii) Profit and loss account		
(iii) Balance sheet		
(iv) (i) & (iii)		
(v) (ii) & (iii)		
2. Choose the correct chronological order of ascertainment of the following profits from		
the profit and loss account :		
(i) Operating Profit, Net Profit, Gross Profit		
(ii) Operating Profit, Gross Profit, Net Profit		
(iii) Gross Profit, Operating Profit, Net Profit		
(iv) Gross Profit, Net Profit, Operating Profit		
3. While calculating operating profit, the following are not taken into account.		
(i) Normal transactions		
(ii) Abnormal items		
(iii) Expenses of a purely financial nature		
$\begin{array}{c} (iv) (ii) \& (iii) \\ (iv) (i) \& (iii) \end{array}$		
(v) (i) & (iii)		
4. Which of the following is correct :		
(i) Operating Profit = Operating profit – Non-operating expenses – Non-operating incomes		
(ii) Operating profit = Net profit + Non-operating Expenses + Non-operating incomes		
(iii) Operating profit = Net profit + Non-operating Expenses - Non-operating incomes		
(iv) Operating profit = Net profit – Non-operating Expenses + Non-operating incomes

8.6 Balance Sheet

The balance sheet is a statement prepared for showing the financial position of the business summarising its assets and liabilities at a given date. The assets reflect debit balances and liabilities (including capital) reflect credit balances. It is prepared at the end of the accounting period after the trading and profit and loss account have been prepared. It is called balance sheet because it is a statement of balances of ledger accounts that have not been transferred to trading and profit and loss account and are to be carried forward to the next year with the help of an opening entry made in the journal at the beginning of the next year.

8.6.1 Preparing Balance Sheet

All the account of assets, liabilities and capital are shown in the balance sheet. Accounts of capital and liabilities are shown on the left hand side, known as *Liabilities*. Assets and other debit balances are shown on the right hand side, known as *Assets*. There is no prescribed form of Balance sheet, for a proprietary and partnership firms. (However, *Schedule III Part I of the Companies Act 2013* prescribes the format and the order in which the assets and liabilities of a company should be shown). The horizontal format in which the balance sheet is prepared is shown in the figure 8.7.

Liabilities	Amount ₹	Assets	Amount ₹
Capital Add Profit Long-term loan Short-term loan Sundry creditors Bills payable Bank overdraft	 XXXX	Furniture Cash Bank Goodwill Sundry debtors Land and Buildings Closing stock	

Balance Sheet ofas at March 31, 2017

Fig. 8.7 : Format	t of a balance sheet
-------------------	----------------------

Refer to our example -1 you will observe that the trial balance of Ankit depicts 14 accounts, out of which 7 accounts have been transferred to the trading and profit and loss account (refer figure 8.3). These are the accounts of revenues and expenses. The analysis of figure 8.3 shows that the business has incurred total expenses of ₹ 1,25,500 and revenues generated are ₹ 1,30,000 making a profit of ₹ 4,500. The remaining *seven items* in the trial balance reflects the capital, assets and liabilities. We are reproducing the trial balance (example -1) to show how the accounts of assets and liabilities of Ankit would be presented in the balance sheet.

Account Title	L.F.	Debit	Credit
		Amount	Amount
		₹	₹

		36,500		36,500

Fig. 8.9 : Showing the balance sheet of Ankit

8.6.2 Relevant Items in the Balance Sheet

Items which are generally included in a balance sheet are explained below :

(1) *Current Assets:* Current assets are those which are either in the form of cash or a can be converted into cash within a year. The examples of such assets are cash in hand/bank, bills receivable, stock of raw materials, semi-finished goods and finished goods, sundry debtors, short term investments, prepaid expenses, etc.

- (2) *Current Liabilities*: Current liabilities are those liabilities which are expected to be paid within a year and which are usually to be paid out of current assets. The examples of such liabilities are bank overdraft, bills payable, sundry creditors, short-term loans, outstanding expenses, etc.
- (3) *Fixed Assets:* Fixed assets are those assets, which are held on a long-term basis in the business. Such assets are not acquired for the purpose of resale, e.g. land, building, plant and machinery, furniture and fixtures, etc. Some times the term 'Fixed Block' or 'Block Capital' is also used for them.
- (4) *Intangible Assets*: These are such assets which cannot be seen or touched. Goodwill, Patents, Trademarks are some of the examples of intangible assets.
- (5) *Investments:* Investments represent the funds invested in government securities, shares of a company, etc. They are shown at cost price. If, on the date of preparation the balance sheet, the market price of investments is lower than the cost price, a footnote to that effect may be appended to the balance sheet.
- (6) *Long-term Liabilities* : All liabilities other than the current liabilities are known as long-term liabilities. Such liabilities are usually payable after one year of the date of the balance sheet. The important items of long term liabilities are long-term loans from bank and other financial institutions.
- (7) *Capital:* It is the excess of assets over liabilities due to outsiders. It represents the amount originally contributed by the proprietor/ partners as increased by profits and interest on capital and decreased by losses drawings and intrest on drawings.
- (8) *Drawings*: Amount withdrawn by the proprietor is termed as drawings and has the effect of reducing the balance on his capital account. Therefore, the drawings account is closed by transferring its balance to his capital account. However it is shown by way of deduction from capital in the balance sheet.

8.6.3 Marshalling and Grouping of Assets and Liabilities

A major concern of accounting is about preparing and presenting the financial statement. The information so provided should be decision useful for the users. Therefore, it becomes necessary that the items appearing in the balance sheet should be properly *grouped* and presented in a particular order.

Marshalling of Assets and Liabilities

In a balance sheet, the assets and liabilities are arranged either in the order of *liquidity* or *permanence*. Arrangement of assets and liabilities in a particular order is known as Marshalling.

In case of *permanence*, the most permanent asset or liability is put on the top in the balance sheet and thereafter the assets are arranged in their reducing level of permanence.

In the balance sheet of Ankit you will find that furniture is the most permanent of all the assets. Out of debtors, bank and cash, debtors will take maximum time to convert back into cash. Bank is less liquid than cash. Cash is the most liquid of all the assets. Similarly, on the liabilities side, the capital, being the most important source of finance will tend to remain in the business for a longer period than the long-term loan. Creditors being a liquid liability will be discharged in the near future. The balance sheet of Ankit in the order of permanence is shown in figure 8.10(a).

Liabilities		Amount ₹	Assets		Amount ₹
Capital <i>Add</i> Profit 10 % Long-term I Creditors	12,000 <u>4,500</u> Joan	16,500 5,000 15,000	Furniture Debtors Bank Cash	. 20	15,000 15,500 5,000 1,000
		36,500			36,500

Balance Sheet of Ankit as on March 31, 2017 (in order of permanence)

Fig. 8.10 (a) :	Items of balance	sheet shown	in the order	of permanance
-----------------	------------------	-------------	--------------	---------------

In case of *liquidity*, the order is reversed. The information presented in this manner would enable the user to have a good idea about the life of the various accounts. The assets account of the relatively permanent nature would continue in the business for a longer time whereas the less permanent or more liquid accounts will change their forms in the near future and are likely to become cash or cash equivalent.

The balance sheet of Ankit in the order of liquidity is shown in figure 8.10(b)

Balance Sheet of Ankit as at March 31, 2017 (in order of liquidity)

Liabilities	Amount ₹	Assets	Amount ₹
Creditors 10 % Long-term loan Capital 12,000 Add Profit <u>4,500</u>	15,000 5,000 16,500 36,500	Cash Bank Debtors Furniture	1,000 5,000 15,500 15,000 36,500

Fig. 8.10 (b) : Items of balance sheet shown in the order of liquidity

Grouping of Assets and Liabilities

The items appearing in the balance sheet can also be properly grouped. The term grouping means putting together items of similar nature under a common heading. For example, the balance of accounts of cash, bank, debtors, etc. can be grouped and shown under the heading of 'current assets' and the balances of all fixed assets and long-term investment under the heading of 'non-current assets'.

Liabilities		Amount ₹	Assets	Amount ₹
Owners Funds			Non Current Assets	
Capital	12,000		Furniture	15,000
Add Profit	<u>4,500</u>	16,500	Current Assets	
Non-Current Liabili	ities		Debtors	15,500
Long-term loan		5,000	Bank	5,000
Current Liabilities			Cash	1,000
Creditors		15,000		
		36,500		36,500

Balance Sheet of Ankit as at March 31, 2017 (in order of permanence)

8.7 Opening Entry

The balances of various accounts in balance sheet are carried forward from one accounting period to another accounting period. In fact, the balance sheet of an accounting period becomes the opening trial balance of the next accounting period. Next year an opening entry is made which opens these accounts contained in the balance sheet.

Refer the balance sheet shown in figure 8.10(c). The opening entry with regard to it will be recorded as follows :

Furniture A/c	Dr.	15,000	
Debtors A/c	Dr.	15,500	
Bank's A/c	Dr.	5,000	
Cash A/c	Dr.	1,000	
To Capital A/c			16,500
To 10 % Long-term loan A/c			5,000
To Creditors A/c			15,000

- Depreciation
- Discount Received
- Trade Expenses
- Financial Statements
- Freight
- Gross Loss
- Interest on Capital
- Net Loss
- Revenue Expenditure
- Salaries
- Sales Return
- **Opening Entries**

Summary with Reference to Learning Objectives

- 1 Meaning, usefulness and types of financial statements : After the agreement of the trial balance, a business enterprise proceeds to prepare financial statements. Financial statements are the statements, which present periodic reports on the process of business enterprises and the results achieved during a given period. Financial statements includs trading and profit and loss account, balance sheet and other statements and explanatory notes, which form part thereof. Information provided by financial statements is useful to management to plan and control the business operations. Financial statement are also useful to creditors, shareholders and employees of the enterprise.
- 2 Meaning need and preparation of trading and profit and loss account: The profit and loss account highlights the profit earned or loss sustained by the business entity in the course of business operation during a given period.

The need for preparing the trading and profit and loss account is to ascertain the net result of business operations during a given period. The profit and loss account shows the items of revenue expenses and losses on the debit side, while items of gain and gross profit are shown on the credit side. For the preparation of the trading and profit and loss account, closing entries are recorded to transfer balances of account of items of expenses and revenues. Net profit or net loss shown by the profit and loss account is transferred to the capital account. 3 *Meaning, characteristic, need and structure of the balance sheet*: The balance sheet is a statement of assets and liabilities of a business enterprise and shows the financial position at a given date Informations contained in a balance sheet is true only on that date. The balance sheet is a part of the final account. But it is not an account, it is only a statement. In a balance sheet the totals of assets and liabilities are always equal. It portrays the accounting equation.

A balance sheet has to be prepared to know the financial position of the business, and the nature and values of its assets and liabilities. All the accounts which have not been closed till the preparation of the profit and loss account are shown in the balance sheet. Assets and liabilities shown in the balance sheet are marshalled in order of liquidity or in order of permanence.

Questions for Practice

Short Answers

- 1. What are the objectives of preparing financial statements ?
- 2. What is the purpose of preparing trading and profit and loss account?
- 3. Explain the concept of cost of goods sold?
- 4. What is a balance sheet. What are its characteristics?
- 5. Distinguish between capital and revenue expenditure and state whether the following statements are items of capital or revenue expenditure :
 - (a) Expenditure incurred on repairs and whitewashing at the time of purchase of an old building in order to make it usable.
 - (b) Expenditure incurred to provide one more exit in a cinema hall in compliance with a government order.
 - (a) Registration fees paid at the time of purchase of a building
 - (b) Expenditure incurred in the maintenance of a tea garden which will produce tea after four years.
 - (c) Depreciation charged on a plant.
 - (d) The expenditure incurred in erecting a platform on which a machine will be fixed.
 - (e) Advertising expenditure, the benefits of which will last for four years.
- 6. What is an operating profit?

Long Answers

- 1. What are financial statements? What information do they provide.
- 2. What are closing entries? Give four examples of closing entries.
- 3. Discuss the need of preparing a balance sheet.
- 4. What is meant by Grouping and Marshalling of assets and liabilities. Explain the ways in which a balance sheet may be marshalled.

Numerical Questions

1. From the following balances taken from the books of Simmi and Vimmi Ltd. for the year ending March 31, 2017, calculate the gross profit.

Closing stock	2,50,000
Net sales during the year	40,00,000
Net purchases during the year	15,00,000

310

Opening stock Direct expenses (*Ans.* Gross profit ₹11,70,000)

2. From the following balances extracted from the books of M/s Ahuja and Nanda. Calculate the amount of :

15,00,000

80,000

- (a) Cost of goods available for sale
- (b) Cost of goods sold during the year
- (c) Gross Profit

	₹
Opening stock	25,000
Credit purchases	7,50,000
Cash purchases	3,00,000
Credit sales	12,00,000
Cash sales	4,00,000
Wages	1,00,000
Salaries	1,40,000
Closing stock	30,000
Sales return	50,000
Purchases return	10,000

- (*Ans.* (a) ₹ 11,65,000 ; (b) ₹11,35,000 ; (c) ₹4,15,000
- 3. Calculate the amount of gross profit and operating profit on the basis of the following balances extracted from the books of M/s Rajiv & Sons for the year ended March 31, 2017.

	र
Opening stock	50,000
Net sales	11,00,000
Net purchases	6,00,000
Direct expenses	60,000
Administration expenses	45,000
Selling and distribution expenses	65,000
Loss due to fire	20,000
Closing stock	70,000

(Ans. Gross profit ₹4,60,000, Operating profit ₹3,50,000)

- Operating profit earned by M/s Arora & Sachdeva in 2016-17 was ₹17,00,000. Its non-operating incomes were ₹1,50,000 and non-operating expenses were ₹3,75,000. Calculate the amount of net profit earned by the firm. (Ans. Net profit ₹14,75,000)
- 5. The following are the extracts from the trial balance of M/s Bhola & Sons as on March 31, 2017

Account title	Debit ₹	Credit ₹
Opening stock Purchases Sales	2,00,000 8,10,000	10,10,000
Ť	10,10,000	10,10,000

(only relevant items)

Closing Stock as on date was valued at ₹3,00,000.

You are required to record the necessary journal entries and show how the above items will appear in the trading and profit and loss account and balance sheet of M/s Bhola & Sons.

6. Prepare trading and profit and loss account and balance sheet as on March 31, 2017 :

Account Title	Amount ₹	Account Title	Amount ₹
Machinery	27,000	Capital	60,000
Sundry debtors	21,600	Bills payable	2,800
Drawings	2,700	Sundry creditors	1,400
Purchases	58,500	Sales	73,500
Wages	15,000		
Sundry expenses	600		
Rent & taxes	1,350		
Carriage inwards	450		
Bank	4,500		
Openings stock	6,000		

Closing stock as on March 31, 2017 ₹22,400

[Ans. Gross profit ₹15,950, Net profit ₹14,000, Total balance sheet ₹75,500]

7. The following trial balance is extracted from the books of M/s Ram on March 31, 2017. You are required to prepare trading and profit and loss account and the balance sheet as on date :

Account title	Amount ₹	Account title	Amount ₹
Debtors	12,000	Apprenticeship premium	5,000
Purchases	50,000	Loan	10,000
Coal, gas and water	6,000	Bank overdraft	1,000
Factory wages	11,000	Sales	80,000
Salaries	9,000	Creditors	13,000
Rent	4,000	Capital	20,000
Discount	3,000	_	
Advertisement	500		
Drawings	1,000		
Loan	6,000		
Petty cash	500		
Sales return	1,000		
Machinery	5,000		
Land and building	10,000		
Income tax	100		
Furniture	9,900		

(Ans. Gross profit: ₹ 12,000, Net profit: ₹ 500, Total balance sheet: ₹ 43,400)

8. The following is the trial balance of Manju Chawla on March 31, 2017. You are required to prepare trading and profit and loss account and a balance sheet as on date :

Account title	Debit Amount ₹	Credit Amount ₹
Opening stock	10,000	
Purchases and sales	40,000	80,000
Returns	200	600
Productive wages	6,000	
Dock and Clearing charges	4,000	
Donation and charity	600	
Delivery van expenses	6,000	
Lighting	500

LEARNING OBJECTIVES

After studying this chapter, you will be able to :

- describe the need for adjustments while preparing the financial statements;
- explain the accounting treatment of adjustments for outstanding and prepaid expenses, accrued and advance receipts of incomes;
- discuss the adjustments to be made regarding deprecia-tion, bad debts, provision for doubtful debts, provision for discount on debtors;
- explain the concepts and adjustment of manager's commission and interest on capital;
- prepare profit and loss account and balance sheet with adjustments.

In chapter 8, you learnt about the preparation of I simple final accounts in the format of trading and profit and loss account and balance sheet. The preparation of simple final accounts pre-supposes the absence of any accounting complexities which are normal to business operations. These complexities arise due to the fact that the process of determining income and financial position is based on the accrual basis of accounting. This emphasises that while ascertaining the profitability, the revenues be considered on earned basis and not on receipt basis, and the expenses be considered on incurred basis and not on paid basis. Hence, many items need some adjustment while preparing the financial statements. In this chapter we shall discuss all items which require adjustments and the way these are brought into the books of account and incorporated in the final accounts.

9.1 Need for Adjustments

According to accrual concept of accounting, the profit or loss for an accounting year is not based on the revenues realised in cash and the expenses paid in cash during that year. There may exist some receipts and expenses in the current year which partially relate to the previous year or to the next year. Also, there may exist incomes and expenses relating to the current year that still need to be brought into books of account. Such items duly adjusted, the final accounts will not reflect the true and fair view of the state of affairs of the business.

For example, an amount of ₹ 1,200 paid on July 01, 2016 towards insurance premium. Any general insurance premium paid usually covers a period of 12 months. Suppose the accounting year ends on March 31, 2017, it would mean that one fourth of the insurance premium is paid on July 01, 2016 relate to the next accounting year 2017-18. Therefore, while preparing the financial statements for 2016-17, the expense on insurance premium that should be debited to the profit and loss account is ₹ 900 (₹ 1,200 – ₹ 300).

Let us take another example. The salaries for the month of March, 2017 were paid on April 07, 2017. This means that the salaries account of 2016-17 does not include the salaries for the month of March 2017. Such unpaid salaries is termed as *salaries outstanding* which have to be brought into books of account and is debited to profit and loss account along with the salaries already paid for the month of April, 2016 up to Feburary, 2017.

Similarly, adjustments may also become necessary in respect of certain incomes received in advance or those which have accrued but are still to be received. Apart from these, there are certain items which are not recorded on day-to-day basis such as depreciation on fixed assets, interest on capital, etc. These are adjusted at the time of preparing financial statements. The purpose of making various adjustments is to ensure that the final accounts reveal the true profit or loss and the true financial position of the business. The items which usually need adjustments are:

- 1. Closing stock
- 2. Outstanding/expenses
- 3. Prepaid/Unexpired expenses
- 4. Accrued income
- 5. Income received in advance
- 6. Depreciation
- 7. Bad debts
- 8. Provision for doubtful debts
- 9. Provision for discount on debtors
- 10. Manager's commission
- 11. Interest on capital

It may be noted that when we prepare the financial statements, we are provided with the trial balance and some other additional information in respect of the adjustments to be made. All adjustments are reflected in the final accounts at two places to complete the double entry. Our earlier example in chapter 8 (Page no. 294) which represents the trial balance of Ankit is reproduced in figure 9.1:

Account Title	Elements	L.F.	Debit Amount ₹	Credit Amount ₹
Cash Bank Wages Salaries Furniture Rent of building Debtors Bad debts Purchases Capital Equity Sales Creditors Long-term loan (raised on 1.4.2013)	Assets Assets Expense Expense Assets Expense Expense Expense Revenue Liabilities Liabilities		1,000 5,000 8,000 25,000 15,000 13,000 15,500 4,500 75,000	12,000 1,25,000 15,000 5,000
Commission received	Revenue			5,000
Total			1,62,000	1,62,000

Trial Balance of Ankit as on March 31, 2017

Additional Information : The stock on March 31, 2017 was ₹ 15,000.

Figure 9.1 : Showing the trial balance of Ankit

We will now study about the items of adjustments and you will observe how these adjustments are helpful in the preparation of financial statements in order to reflect the true profit and loss and financial position of the firm.

9.2 Closing Stock

As per the example in chapter 9 (Page no. 336), the closing stock represents the cost of unsold goods lying in the stores at the end of the accounting period. The adjustment with regard to the closing stock is done by (i) by crediting it to the trading and profit and loss account, and (ii) by showing it on the asset side of the balance sheet. The adjustment entry to be recorded in this regard is :

Closing stock A/c	Dr.
To Trading A/c	

The closing stock of the year becomes the opening stock of the next year and is reflected in the trial balance of the next year. The trading and profit

D-

and loss account of Ankit for the year ended March 31, 2017 and his balance sheet as on that date shall appear as follows :

Dr.			Cr.
Expenses/Losses	Amount	Revenues/Gains	Amount
	₹		₹
Purchases	75,000	Sales	1,25,000
Wages	8,000	Closing stock	15,000
Gross profit c/d	57,000	-	
	1,40,000		1,40,000
Salaries	25,000	Gross profit b/d	57,000
Rent of building	13,000	Commission received	5,000
Bad debts	4,500		
Net profit (transferred to	19,500		
Ankit's capital account)		1.5	
	62,000		62,000

Trading and Profit and Loss Account of Ankit for the year ended March 31, 2017

Sometimes the opening and closing stock are adjusted through purchases account. In that case, the entry recorded is as follows :

Closing stock A/c

To Purchases A/c

This entry reduces the amount in the purchases account and is also known as *adjusted purchases* which is shown on the debit side of the trading and profit and loss account. In this context, it may be noted, that the closing stock will not be shown on the credit side of the trading and profit and loss as it has been already been adjusted through the purchases account. Not only, in such a situation, even the opening stock will not be separately reflected in the trading and profit and loss account, as it is also adjusted in purchases by recording the following entry:

Purchases A/c

Dr.

Dr.

To Opening stock A/c

Another important point to be noted in this context is that when the opening and closing stocks are adjusted through purchases, the trial balance does not show any opening stock. Instead, the closing stock shall appear in the trial balance (not as additional information or as an adjustment item) and so also the adjusted purchases. In such a situation, the adjusted purchases shall be debited to the trading and profit and loss account.

0-

The closing stock shall be shown on the assets side of the balance sheet as shown below:

	Amount	Assets	Amount
	₹		₹
		Non-Current Assets

Balance Sheet of Ankit as at March 31, 2017

9.3 Outstanding Expenses

It is quite common for a business enterprise to have some unpaid expenses in the normal course of business operations at the end of an accounting year. Such items usually are wages, salaries, interest on loan, etc.

When expenses of an accounting period remain unpaid at the end of an accounting period, they are termed as *outstanding expenses*. As they relate to the earning of revenue during the current accounting year, it is logical that they should be duly charged against revenue for computation of the correct amount of profit or loss. The entry to bring such expenses into account is :

Concerned expense A/c Dr. To Outstanding expense A/c

The above entry opens a new account called *Outstanding Expenses* which is shown on the liabilities side of the balance sheet. The amount of outstanding expenses is added to the total of expenses under a particular head for the purpose of preparing trading and profit and loss account.

For example, refer to Ankit's trial balance (refer figure 10.1). You will notice that wages are shown at ₹ 8,000. Let us assume that Ankit owes ₹500 as wages relating to the year 2016-17 to one of his employees. In that case, the correct expense on wages amounts to ₹ 8,500 instead of ₹ 8,000. Ankit must show ₹ 8,500 as expense on account of wages in the trading and profit and loss account and recognise a current liability of ₹ 500 towards the sum owed to his staff. It will be referred to as *wages outstanding* and it will be adjusted to wages account by recording the following journal entry:

Wages A/c	Dr.	500	
To Wages outstanding A/c			500

The amount of outstanding wages will be added to wages account for the preparation of the trading and profit and loss account as follows :

Dr.			Cr.
Expenses/Losses	Amount	Revenues/Gains	Amount
	₹		₹
Purchases	75,000	Sales	1,25,000
Wages 8,000			
Add Outstanding wages 500	8,500	Closing stock	15,000
Gross profit c/d	56,500		
	1,40,000		1,40,000
Salaries	25,000	Gross profit b/d	56,500
Rent of building	13,000	Commission received	5,000
Bad debts	4,500		
Net profit (transferred to	19,000		
Ankit's capital account)			
	61,500		61,500

Trading and Profit and Loss Account of Ankit for the year ended March 31, 2017

Observe carefully the trading and profit and loss account of Ankit. Did you notice the amount of net profit is reduced to ₹ 19,000 on account of outstanding wages. The item relating to outstanding wages will be shown in balance sheet as follows :

Balance Sheet of Ankit as at March 31, 2017

Liabilities	Amount ₹	Assets	Amount ₹
Owners FundsCapital12,000Add Profit19,000Non-Current LiabilitiesLong-term loanCurrent LiabilitiesCreditorsOutstanding wages		Non-Current Assets Furniture Current Assets Debtors Bank Cash Closing stock	15,000 15,500 5,000 1,000 15,000
	51,500		51,500

9.4 Prepaid Expenses

There are several items of expense which are paid in advance in the normal course of business operations. At the end of the accounting year, it is found that the benefits of such expenses have not yet been fully received; a portion of its benefit would be received in the next accounting year. This portion of expense, is carried forward to the next year and is termed as *prepaid expenses*. The necessary adjustment in respect of prepaid expenses is made by recording the following entry:

Dr.

Prepaid expense A/c To concerned expense A/c

The effect of the above adjustment entry is that the amount of prepaid part is deducted from the total of the particular expense, and the new account of prepaid expense is shown on the assets side of the balance sheet. For example, in Ankit's trial balance, let us assume that the amount of salary paid by him to the employees includes an amount of ₹ 5,000 which was paid in advance to one of his employees upon his joining the office. This implies that Ankit has overpaid his staff by ₹ 5,000 on account of his salary. Hence, correct expense on account of salary during the current period will be ₹ 20,000 instead of ₹ 25,000. Ankit must show ₹ 20,000 expense on account of salary in the profit and loss account and recognise a current asset of ₹ 5,000 as an advance salary to the employee. It will be termed as prepaid salary account and will be recorded by the following journal entry :

Prepaid salary A/c

To salary A/c

Dr.

5.000

Cr

5.000

The account of prepaid salary will be shown in the trading and profit and loss account as follows:

Dr.			Cr.
Expenses/Losses	Amount ₹	Revenues/Gains	Amount ₹
Purchases Wages 8,000 Add Outstanding wages <u>500</u> Gross profit c/d	75,000 8,500 56,500	Sales Closing stock	1,25,000 15,000
X	1,40,000		1,40,000
Salaries25,000Less Prepaid salary(5,000)	20,000	Gross profit b/d	56,500
Rent of building Bad debts Net profit (transferred to Ankit	13,000 4,500 24,000	Commission received	5,000
capital account)	61,500		61,500
	01,000		01,000

Trading and Profit and Loss Account of Ankit for the year ended March 31, 2017

Observe how the prepaid salary has resulted in an increase of net profit by \mathbf{z} 5,000 making it as \mathbf{z} 24,000 Further, the item relating to prepaid salary will be shown in the balance sheet on the assets side as follows :

	Amount ₹	Assets	Amount ₹
		Non-Current Assets	
12,000		Furniture	15,000
<u>24,000</u>	36,000	Current Assets	
		Debtors	15,500
	5,000	Prepaid salary	5,000

Balance Sheet of Ankit as at March 31, 2017

9.5 Accrued Income

It may also happen that certain items of income such as interest on loan, commission, rent, etc. are earned during the current accounting year but have not been actually received by the end of the same year. Such incomes are known as *accrued income*. The adjusting entry for accrued income is :

Accrued income	A/c	Dr.
To Concerned	income A/c	

The amount of accrued income will be added to the related income in the profit and loss account and the new account of accrued income will appear on the asset side of the balance sheet.

Let us, for example, assume that Ankit was giving a little help to a fellow businessman by introducing few parties to him on commission for this service. In the trial balance of Ankit you will notice an item of commission received amounting to ₹ 5,000. Assume that the commission amounting to ₹1,500 was still receivable from the fellow businessman. This implies that income from commission earned during 2016-17 is ₹ 6, 500 (₹5, 000 + ₹ 1,500) Ankit needs to record an adjustment entry to give effect to the accrued commission as follows :

Accrued Commission A/c	Dr.	1,500	
To Commission A/c			1,500

The account of accrued income will be recorded in trading and profit and loss account as follows :

		Cr.
Amount ₹	Revenues/Gains	Amount ₹
	Sales Closing stock	1,25,000 15,000
1,40,000	0	1,40,000
<u>0)</u> 20,000 13,000	Gross profit b/d Commission received5,000 Add Accrued <u>1,500</u>	56,500 6,500
4,500 25,500 63,000	commission	63,000
()	₹ 000 8,500 56,500 1,40,000 000 20,000 13,000 4,500 25,500	₹ 00 00 75,000 8,500 Sales Closing stock 1,40,000 6 1,40,000 20,000 13,000 Commission received5,000 4,500 commission 25,500 commission

Trading and Profit and Loss Account of Ankit for the year ended March 31, 2017

Observe that the accrued income has resulted in an increase in the net profit by \gtrless 1,500 making it as \gtrless 25,500. Further, it will be shown in the balance sheet of Ankit on the assets side under the head current asset.

Balance Sheet of Ankit as at March 31, 2017

Liabilities	0	Amount ₹	Assets	Amount ₹
Owners Funds Capital Add Profit Non-Current Liabilities Long-term Ioan Current Liabilities Creditors Outstanding wages	12,000 <u>25,500</u>	37,500 5,000 15,000 500	Non-Current Assets Furniture Current Assets Debtors Prepaid salary Accrued commission Bank Cash	15,000 15,500 5,000 1,500 5,000 1,000 15,000
		58,000	Closing stock	58,000

9.6 Income Received in Advance

Sometimes, a certain income is received but the whole amount of it does not belong to the current period. The portion of the income which belongs to the next accounting period is termed as income received in advance or an *Unearned Income*. Income received in advance is adjusted by recording the following entry:

Concerned income A/c Dr. To Income received in advance A/c

The effect of this entry will be that the balance in the income account will be equal to the amount of income earned for the current accounting period, and the new account of income received in advance will be shown as a liability in the balance sheet.

For example, let us assume Ankit has agreed in March 31, 2017 to sublet a part of the building to a fellow shopkeeper $@ \notin 1,000$ per month. The person gives him rent in advance for the next three months of April, May and June. The amount received had been credited to the profit and loss account. However, this income does not pertain to current year and hence will not be credited to profit and loss account. It is *income received in advance* and will be recognised as a liability amounting to \notin 3,000. Ankit needs to record an adjustment entry to give effect to income received in advance by way of following journal entry:

This will lead a new account of rent received in advance of \mathbf{E} 3,000 which will appear as follows :

Liabilities	Amount ₹	Assets	Amount ₹
Owners FundsCapital12,000Add Net profit25,500Non Current LiabilitiesLong-term loanCurrent LiabilitiesCreditorsOutstanding wagesRent received in advance		Non Current Assets Furniture Current Assets Debtors Prepaid salary Accrued commission Bank Cash Closing stock	$\begin{array}{c} 15,000\\ 15,500\\ 5,000\\ 1,500\\ 5,000\\ 4,000\\ 15,000\\ 61,000\end{array}$

Balance Sheet of Ankit as at March 31, 2017

9.7 Depreciation

Recall from chapter 7 (Part-I), that depreciation is the decline in the value of assets on account of wear and tear and passage of time. It is treated as a business expense and is debited to profit and loss account. This, in effect, amounts to writing-off a portion of the cost of an asset which has been used in the business for the purpose of earning profits. The entry for providing depreciation is :

Dr.

Dr.

Depreciation A/c To Concerned asset A/c

In the balance sheet, the asset will be shown at cost *minus* the amount of depreciation. For example, the trial balance in our example shows that Ankit has a furniture account with a balance of ₹ 15,000. Let us assume that furniture is subject to a depreciation of 10% per annum. This implies that Ankit must recognise that at the end of the year the value attached to furniture is to be reduced by ₹ 1,500 (₹ 15,000 × 10%). Ankit needs to record an adjustment entry to give effect to depreciation on furniture as follows :

Depreciation A/c

To Furniture A/c

1,500 1,500

Depreciation will be shown in the profit and loss account and balance sheet as follows :

Dr.		OX	Cr.
Expenses/Losses	Amount ₹	Revenues/Gains	Amount ₹
Purchases Wages 8,000 <i>Add</i> Outstanding wages (500) Gross Profit c/d	75,000 8,500 56,500	Sales Closing stock	1,25,000 15,000
	1,40,000		1,40,000
Salaries25,000Less Prepaid salary(5,000)Dent of building	20,000	Gross profit b/d	56,500
Rent of building	13,000	Commission received 5,000Add Accrued1,500	6,500
Depreciation-Furniture Bad debts	1,500 4,500	Commission	
Net profit (transferred to Ankit's capital account)	24,000		
	63,000		63,000

Trading and Profit and Loss Account of Ankit for the year ended March 31, 2017

Notice that the amount of net profit declines with the adjustment of depreciation. Let us now see how depreciation as an expense will be shown in balance sheet.

Liabilities		Amount ₹	Assets	Amount ₹
Owners Funds			Non-Current Assets	
Capital	12,000		Furniture 15,000	
Add Profit	<u>24,000</u>	36,000	<i>Less</i> Depreciation (1,500)	13,500
Non-Current Liabilities			Current Assets	
Long-term loan		5,000	Debtors	15,500
Current Liabilities			Prepaid salary	5,000
Creditors		15,000	Accrued commission	1,500
Outstanding wages		500	Bank	5,000
Rent received in advance		3,000	Cash	4,000
			Closing stock	15,000
		59,500		59,500

Balance Sheet of Ankit as at March 31, 2017

9.8 Bad Debts

Bad debts refer to the amount that the firm has not been able to realise from its debtors. It is regarded as a loss and is termed as *bad debt*. The entry for recording bad debt is:

Dr.

Bad debts A/c To Debtors A/c

You will notice in Ankit's trial balance, that it contains bad debts amounting to ₹ 4,500. Whereas, the sundry debtors of Ankit are reported as ₹ 15,500. The existence of bad debts in the trial balance signifies that Ankit has incurred a loss arising out of bad debts during the year and which has been already recorded in the books of account.

However, assuming one of his debtors who owed him ₹ 2,500 had become insolvent, and nothing is receivable from him. But the amount of bad debts related to the current year is still to be account for. This fact appears as additional information and is termed as *further bad debts*. The adjustment entry to be recorded for the amount will be as follows. For this purpose, Ankit needs to record an adjustment entry as under :

Bad debts A/c	Dr.	2,500	
To Debtors A/c			2,500

This entry will reduce the value of debtors to ₹ 13,000(₹ 15,500 – ₹ 2,500) and increases the amount of bad debts to ₹ 7,000 (₹ 4,500 + ₹ 2,500).

Cr.

The treatment of further bad debts in profit and loss account and balance sheet is shown below :

# 9.9 Provision for Bad and Doubtful Debts

In the above balance sheet, debtors now appears at  $\overline{13,000}$ , which is their estimated realisable value during next year. It is quite possible that the whole

of this amount may not be realised in future. However, it is not possible to accurately know the amount of such bad debts. Hence, we make a reasonable estimate of such loss and provide the same. Such provision is called *provision for bad debts* and is created by debiting profit and loss account. The following journal entry is recorded in this context :

Profit and Loss A/c Dr. To Provision for doubtful debts A/c

Provision for doubtful debts is also shown as a deduction from the debtors on the asset side of the balance sheet.

Let us assume, Ankit feels that 5% of his debtors on March 31, 2017 are likely to default on their payments next year. This implies he expects bad debts of ₹ 650 (₹ 13,000 × 5%). Ankit needs to record the adjustment entry as :

Profit and loss A/cDr.650To Provision for doubtful debts A/c650

This implies that  $\overline{\mathbf{x}}$  650 will reduce the current year's profit on account of doubtful debts. In the balance sheet, it will be shown as a deduction from sundry debtors.

Trading and Profit and Loss Account of Ankit

Balance Sheet of Ankit as at March 31, 2017

It may be noted that the provision created for doubtful debts at the end of a particular year will be carried forward to the next year and it will be used for meeting the loss due to bad debts incurred during the next year. The provision for doubtful debts brought forward from the previous year is called the *opening provision or old provision*. When such a provision already exists, the loss due to bad debts during the current year are adjusted against the same and while making provision for doubtful debts required at the end of the current year is called *new provision*. The balance of old provision as given in trial balance should also be taken into account.

Let us take an example to understand how bad debts and provision for doubtful debts are recorded. An extract from a trial balance on March 31, 2017 is given below :

	₹
Sundry debtors	32,000
Bad debts	2,000
Provision for doubtful debts	3,500

#### Additional Information :

Write-off further bad debts  $\gtrless$  1,000 and create a provision for doubtful debts @ 5% on debtors.

In this case, the following journal entries will be recorded :

Date	Particulars	L.F.	Debit Amount ₹	Credit Amount ₹
March 31, 2017	(a) Bad debts A/c Dr. To Sundry debtors (Futher bad debts)		1,000	1,000
	<ul><li>(b) Provision for doubtful debts A/c Dr. To Bad debts A/c</li><li>(Bad debts adjusted against the provision)</li></ul>		3,000	3,000
	Profit and Loss A/c Dr. To Provision for doubtful debts A/c (Amount charges from profit and loss account)		1,050	1,050

#### Profit and Loss Account for the year ended March 31, 2017

		₹	₹
Provision for doubtful de	ebts:		
Bad debts	2,000		
Further bad debts	1,000		
New provision	<u>1,550</u>		
	4,550		
Less Old provision	3,500	1,050	

*Only relevant items.

## Balance Sheet as at March 31, 2017

	Sundry debtors Less Further bad debts Less Provision	32,000 ( <u>1,000)</u> 31,000 ( <u>1,550</u> )	₹
X	for doubtful debts	<u>(1,000)</u>	29,450

*Only relevant items.

**Note :** The amount of new provision for doubtful debts has been calculated as follows: ₹  $31,000^{1} \times 5/100 = ₹ 1,550$ .

# 9.10 Provision for Discount on Debtors

A business enterprise allows discount to its debtors to encourage prompt payments. Discount likely to be allowed to customers in an accounting year

227

can be estimated and provided for by creating a provision for discount on debtors. Provision for discount is made on good debtors which are arrived at by deducting further bad debts and the provision for doubtful debts. The following journal entry is recorded to create provision for discount on debtors:

Profit and loss A/c Dr. To Provision for discount on debtors A/c

As stated above, the provision for discount on debtors will be created only on good debtors. It will be calculated on the amount of debtors arrived at after deducting the doubtful debts, i.e. ₹ 12,350 (₹ 13,000 – ₹ 650). Ankit needs to record the adjustment entry as :

Profit and loss A/c Dr 227 To Provision for discount on debtors A/c

This will reduce the current year profit by  $\gtrless$  227 on account of probable discount on prompt payment. In the balance sheet, it will be shown as a deduction from the debtors account to portray correctly the expected realiable value of debtors as ₹ 12,123.

#### Trading and Profit and Loss Account of Ankit for the year ended March 31, 2017

Cr. 	56,123		56,123

Balance Sheet of Ankit as on March 31, 2017

In the subsequent year, the discount will be transferred to the provision for discount on debtors account. The account will be treated in the same manner as the provision for doubtful debts.

# 9.11 Manager's Commission

The manager of the business is sometimes given the commission on the net profit of the company. The percentage of the commission is applied on the profit either *before charging such commission* or *after charging such commission*. In the absence of any such information, it is assumed that commission is allowed as a percentage of the net profit before charging such commission.

Suppose the net profit of a business is  $\gtrless$  110 before charging commission. If the manager is entitled to 10% of the profit before charging such commission, the commission will be calculated as :

In case the commission is 10% of the profit after charging such commission, it will be calculated as :

= Profit before commission × Rate of commission/ (100 + commission)

The managers commission will be adjusted in the books of account by recording the following entry :

Profit and loss A/c Dr. To Manager's commission A/c

Let us recall our example and assume that Ankit's manager is entitled to a commission @ 10%. Observe the following profit and loss account if it is based on :

(i) amount of net profit before charging such commission

(ii) amount of profit after charging such commission.

Dr.				Cr.
Expenses/Losses		Amount ₹	Revenues/Gains	Amount ₹

Balance Sheet of Ankit as at March 31, 2017

# 9.12 Interest on Capital

Sometimes, the proprietor may like to know the profit made by the business after providing for interest on capital. In such a situation, interest is calculated at a given rate of interest on capital as at the beginning of the accounting year. If however, any additional capital is brought during the year, the interest may also be computed on such amount from the date on which it was brought into the business. Such interest is treated as expense for the business and the following journal entry is recorded in the books of account:

Interest on capital A/c

Dr.

To Capital A/c

In the final accounts, it is shown as an expense on the debit side of the profit and loss account and added to capital in the balance sheet.

Let us assume, Ankit decides to provide 5% interest on his capital. This shall amount to  $\overline{\mathbf{x}}$  600 for which the following journal entry will be recorded:

Interest on capital A/c	Dr.	600
To Capital A/c		600

This implies that net profit shall be reduced by  $\overline{\mathbf{x}}$  600. As a result, the reduced amount of profit shall be added to the capital in the balance sheet.

But, when interest on capital shall be added to the capital, this effect shall be neutralised. As shown below :  $\mathbf{F}$ 

ζ.
12,000

366

You are required to :

- (i) Redraft the Trial Balance.
- (ii) Prepare final accounts for the year ended March 31, 2017 after giving effect to the following adjustments:
  - (a) Taxes are paid for 10 months only.
  - (b) Creditors worth ₹ 780 have accepted bills payables.
  - (c) Depreciate furniture by 10%.
  - (d) Trucks were depreciated to the extent of ₹ 21,000.
  - (e) Wages includes ₹ 2,000 for the making of Furniture.
  - (f) Closing Stock is of ₹ 20,000.
  - (g) Provide for Manager's Commission at 10% on the Net Profit before charging such commission.
  - (h) Land was acquired on 1st April, 2016 by paying a claim at 50% less than market value to the owner.
- (iii) Name the accounting principles which will be followed while treating the adjustment (a), (c) and (e) above?
   (Correct total of Trial Balance ₹ 2,83,620)

# Key Terms Introduced in the Chapter

- Outstanding /Accrued expenses
- Accrued Incomes
- Depreciation
- Provision for doubtful debts
- Managers Commission

- Prepaid/Unexpired expenses
- Income received in advance
- Bad Debts
- Provision for discount on debtors
- Interest on Capital

#### Summary with Reference to Learning Objectives

- 1. *Need for adjustments*: For the preparation of financial statements, it is necessary that all the adjustments arising out of the accrual basis of accounting are made at the end of the accounting period. Another important consideration in the preparation of final accounts with adjustments, is the distinction between capital and revenue items. Entries which are recorded to give effect to these adjustments are known as adjusting entries.
- 2. *Outstanding expenses* : At the end of the accounting period sometimes a business enterprises is left with some unpaid expenses due to one reason or another. Such expenses are termed as outstanding expenses.

- 3. *Prepaid expenses*: At the end of the accounting year, it is found that the benefits of some expenses have not been fully received; a portion of total benefits would be received in the next accounting year. That portion of the expense, the benefit of which will be received during the next accounting period is known as 'prepaid expenses'.
- 4. *Accrued Income* : These are certain items is received by a business enterprise but the whole amount of it does not belong to the next period. Such portion of income which belongs to the next accounting period is income received in advance and is known as "unearned income".
- 5. *Depreciation* : Depreciation is the decline in the value of an asset an account of wear and tear or passage of time or with. It actually amounts to writing off a portion of the cost of an asset which has been used in the business for the purpose of earning profits. In the balance sheet, the asset is shown at loss minus the amount of depreciation.
- 6. *Provisions for bad and doubtful debts* : It is a normal feature of business operations that some debts prove irrecoverable which means that the amount to the realised from them becomes had to view of this. An attempt is made to bring in a certain element of certainty in the amount in respect of bad debts charged every year against incomes.

## **Questions for Practice**

#### Short Answers

- 1. Why is it necessary to record the adjusting entries in the preparation of final accounts?
- 2. What is meant by closing stock? Show its treatment in final accounts?
- 3. State the meaning of:
  - (a) Outstanding expenses
  - (b) Prepaid expenses
  - (c) Income received in advance
  - (d) Accrued income
- 4. Give the Performa of income statement and balance in vertical form.
- 5. Why is it necessary to create a provision for doubtful debts at the time of preparation of final accounts?
- 6. What adjusting entries would you record for the following :
  - (a) Depreciation
  - (b) Discount on debtors
  - (c) Interest on capital
  - (d) Manager's commission
- 7. What is meant by provision for discount on debtors?
- 8. Give the journal entries for the following adjustments :
  - (a) Outstanding salary ₹ 3,500.
  - (b) Rent unpaid for one month at  $\mathbf{E}$  6,000 per annum.
  - (c) Insurance prepaid for a quarter at ₹ 16,000 per annum.
  - (d) Purchase of furniture costing ₹ 7,000 entered in the purchases book.

#### 368

#### Long Answers

- 1. What are adjusting entries? Why are they necessary for preparing final accounts?
- 2. What is meant by provision for doubtful debts? How are the relevant accounts prepared and what journal entries are recorded in final accounts? How is the amount for provision for doubtful debts calculated?
- 3. Show the treatment of prepaid expenses depreciation, closing stock at the time of preparation of final accounts when:
  - (a) When given inside the trial balance?
  - (b) When given outside the trial balance?

Numerical Questions

1. Prepare a trading and profit and loss account for the year ending March 31, 2017. from the balances extracted of M/s Rahul Sons. Also prepare a balance sheet at the end of the year.

Account Title	Amount ₹	Account Title	Amount ₹
Stock	50,000	Sales	1,80,000
Wages	3,000		2,000
Salary	8,000	Discount received	500
Purchases	1,75,000	Provision for doubtful debts	2,500
Sales return	3,000	Capital	3,00,000
Sundry Debtors	82,000	Bills payable	22,000
Discount allowed	1,000	Commission received	4,000
Insurance	3,200	Rent	6,000
Rent Rates and Taxes	4,300	Loan	34,800
Fixtures and fittings	20,000		
Trade expenses	1,500		
Bad debts	2,000		
Drawings	32,000		
Repair and renewals	1,600		
Travelling expenses	4,200		
Postage	300		
Telegram expenses	200		
Legal fees	500		
Bills receivable	50,000		
Building	1,10,000		
	5,51,800		5,51,800

#### Adjustments

- 1. Commission received in advance ₹1,000.
- 2. Rent receivable ₹ 2,000.
- 3. Salary outstanding ₹ 1,000 and insurance prepaid ₹ 800.

- 4. Further bad debts ₹ 1,000 and provision for doubtful debts @ 5% on debtors and discount on debtors @ 2%.
- 5. Closing stock ₹ 32,000.
- 6. Depreciation on building @ 6% p.a.

(*Ans* : Gross loss ₹17,000 ; Net loss ₹43,189 ; Total balance sheet ₹2,83,611)

2. Prepare a trading and profit and loss account of M/s Green Club Ltd. for the year ending March 31, 2017. from the following figures taken from his trial balance :

Account Title	Amount ₹	Account Title	Amount ₹
Opening stock	35,000	Sales	2,50,000
Purchases	1,25,000	Purchase return	6,000
Return inwards	25,000	Creditors	10,000
Postage and Telegram	600	Bills payable	20,000
Salary	12,300	Discount	1,000
Wages	3,000	Provision for bad debts	4,500
Rent and Rates	1,000	Interest received	5,400
Packing and Transport	500	Capital	75,000
General expense	400	$ \rightarrow \rightarrow$	
Insurance	4,000		
Debtors	50,000		
Cash in hand	20,000		
Cash at bank	40,000		
Machinery	20,000		
Lighting and Heating	5,000		
Discount	3,500	O	
Bad debts	3,500		
Investment	23,100		
	3,71,900		3,71,900

#### Adjustments

- 1. Depreciation charged on machinery @ 5% p.a.
- 2. Further bad debts ₹1,500, discount on debtors @ 5% and make a provision on debtors @ 6%.
- 3. Wages prepaid ₹1,000.
- 4. Interest on investment @ 5% p.a.
- 5. Closing stock 10,000.
- (Ans. : Gross Profit ₹79.000 ; Net Profit ₹52,565 ; Total Balance Sheet ₹1,57,565).

3. The following balances has been extracted from the trial of M/s Runway Shine Ltd. Prepare a trading and profit and loss account and a balance sheet as on March 31, 2017.

Account Title	Amount ₹	Account Title	Amount ₹
Purchases	1,50,000	Sales	2,50,000
Opening stock	50,000	Return outwards	4,500
Return inwards	2,000	Interest received	3,500
Carriage inwards	4,500	Discount received	400
Cash in hand	77,800	Creditors	1,25,000
Cash at bank	60,800	Bill payable	6,040
Wages	2,400	Capital	1,00,000
Printing and Stationery	4,500		
Discount	400		
Bad debts	1,500		
Insurance	2,500		
Investment	32,000

Bills receivable	20,000		
Postage and Telegraph	400		
Commission	200		
Interest	1,000		
Repair	440		
Lighting Charges	500		
Telephone charges	100		
Carriage outward	400		
Motor car	25,000		
	4,89,440		4,89,440

Adjustments

- 1. Further bad debts ₹ 1,000. Discount on debtors ₹ 500 and make a provision on debtors @ 5%.
- 2. Interest received on investment @ 5%.
- 3. Wages and interest outstanding ₹ 100 and ₹ 200 respectely.
- 4. Depreciation charged on motor car @ 5% p.a.
- 5. Closing Stock ₹ 32,500.
- (Ans. : Gross profit ₹ 78,000 ; Net profit ₹ 66,010, Total balance sheet ₹ 2,97,350).

4. From the following Trial Balance you are required to prepare trading and profit and loss account for the year ending March 31, 2017 and Balance Sheet on that date.

Particulars	Amount ₹	Particulars	Amount ₹
Opening stock	25,000	Sales	7,00,000
Furniture	16,000	Creditors	72,500
Purchases	5,55,300	Bank Overdraft	50,000
Carriage Inwards	4,700	Provision for bad and	2,100
Bad debts	1,800	doubtful debts	
Wages	52,000	Discount	500
Debtors	80,000	Capital	2,00,000
Sales Return	15,000	Purchases Return	20,000
Rent	24,000		
Miscellaneous Expenses	3,400		
Salaries	68,000		
Cash	8,900		
Drawings	14,000		
Buildings	1,60,000		
Advertising	10,000		
Interest on Bank Overdraft	7,000		
	10,45,100		10,45,100

Adjustments

- 1. Closing stock valued at ₹ 36,000.
- 2. Private purchases amounting to ₹ 5000 debited to purchases account.
- 3. Provision for doubtful debts @ 5% on debtors.
- 4. Sign board costing ₹ 4,000 includes in advertising.
- 5. Depreciate furniture by 10%.

(*Ans* : Gross Profit ₹1,09,000; Net loss ₹ 4,600; Total balance sheet ₹2,98,900).

## 372

Account Title	Amount ₹	Account Title	Amount ₹

	2,73,600	2,73,600

Closing stock was valued ₹ 20,000.

- (a) Interest on capital @ 10%.
- (b) Interest on drawings @ 5%.
- (c) Wages outstanding ₹ 50.
- (d) Outstanding salary ₹ 20.
- (e) Provide a depreciation @ 5% on plant and machinery.
- (f) Make a 5% provision on debtors.

(Ans.: Gross profit ₹ 29,760 ; Net loss ₹ 8,973 ; Total balance sheet ₹1,28,000)

14. The following balances appeared in the trial balance of M/s Kapil Traders as on March 31, 2017

	₹
Sundry debtors	30,500
Bad debts	500
Provision for doubtful debts	2,000

The partners of the firm agreed to records the following adjustments in the books of the Firm: Further bad debts ₹300. Maintain provision for bad debts 10%. Show the following adjustments in the bad debts account, provision account, debtors account, profit and loss account and balance sheet.

- (Ans : Dr. Profit and Loss account ₹1,820)
  - 15. Prepare the bad debts account, provision for account, profit and loss account and balance sheet from the following information as on March 31, 2017

	₹
Debtors	80,000
Bad debts	2,000
Provision for doubtful debts	5,000

### Adjustments :

Bad debts `500 Provision on debtors @ 3%. (*Ans* : Credit Profit and Loss account ₹115)

### Checklist to Test Your Understanding

1. (c), 2. (d), 3. (b), 4. (a), 5. (d)

## APPENDIX

# **Description of Commonly Used Functions in Access**

There are three types of functions that are used to set the Control Source property of calculated controls and/or to form part of calculated field expression in SQL statement. A brief description of the commonly used functions is below :

## A-1. Domain Aggregate Functions

These functions are used to perform calculations based on values in a field of a table or query. Criteria to select the set of records in the table or query that is desired to be used for calculations may also be specified. The criteria, if not specified, imply that all the records of the table or query specific to the field are used for computation. All the domain aggregate functions use the same syntax as is given hereunder :

DFunction ("FldName", "TblName" or "OrvName", "SrchCond")

Wherein DFunction refers to a named domain aggregate function. A brief description of its input arguments is given below:

FldName : It refers to the name of field that is to be searched in a table or query, which is specified as an argument.

TblName (or QueryName) : It refers to the name of a table or query that contains the field specified as second input argument.

SrchCond : It refers to the search condition on the basis of which the relevant record is searched.

Some of the important domain aggregate functions have been described as below :

(a) DLookup : This function is meant to look up information that is stored in a table or query, which is not the underlying source of Access Form or Report. It is used to set the Control Source property of a calculated control to display data from other table or query. Consider the following example:

DLookup ("Name", "Accounts", "Code = '110001")

In the above example, this function has been applied to search the name of account (in Accounts table) whose code is '110001'.

(b) DMax and DMin : These functions are used to retrieve respectively the maximum and minimum values in the specified field. Consider the following example :

DMin ("Amount", "Vouchers", "Debit = '711001")

Dmax ("Amount", "Vouchers", "Debit = '711001")

In the above examples, the amount of minimum purchase transaction and maximum purchase transaction is retrieved and reported. It may also be noted that '711001' is the code of Purchase account in Accounts table

(c) DSum : This function computes and returns the sum of the values in the specified field or expression. For Example, in a table : **Sales** that contains

ItemCode, Price and Quantity as fields, the total amount of *sales* may be computed by using the DSum () function as follows :

DSum ("Price*Quantity", "Sales")

However, if the total sales is to computed for a particular item coded as 1678, the DSum () function shall be applied as follows :

```
DSum ("Price*Quantity", "Sales", "ItemCode = 1678")
```

(d) DFirst and DLast : These functions are used to retrieve respectively the values in the specified field from first and last physical records. Consider the following application examples :

Consider the following application exam

DFirst ("Name", "Accounts")

DLast ("Name", "Accounts")

In the above examples, the name first and last account that physically exists in Accounts table is retrieved and reported.

(e) DCount : This function is meant to compute the number of records with non-null values in the specified field. Consider the following application example :

DCount ("*", "Accounts")

In the above example, The number of records in accounts table are counted and reported by DCount () function.

## A-2. SQL Aggregate Functions

The SQL aggregate functions have the functionality similar to that of domain aggregate function. However, unlike domain aggregate functions, these functions cannot be called directly into controls used in Forms and Reports of Access. These functions are used in SQL statements that provide the underlying record source of Forms and Reports. All these functions, when used require the GROUP BY clause in SQL statement :

(a) Sum : This function is used to compute and return the sum of a set of values. For Example, consider the following SQL statement that has been used in Chapter-V

to prepare the underlying information source of Trial Balance (Model-I.). **SELECT** Debit As Code, **SUM** (Amount) **AS** Total **FROM** VOUCHERS

GROUP BY Debit ;

In the above SQL statement, Sum () has been used to compute the total amount by which the transacted accounts have beeen debited.

(b) Min and Max : These functions are used to retrieve respectively the minimum and maximum of value set with respect to field or query expression. For Example, the following SQL statement is capable of returning the amount of minimum and maximum sales transaction in Model-I :

```
SELECT Min (Amount) As MinSales, Max (Amount) As MaxSales
FROM Vouchers
WHERE Credit = '811001';
```

### Appendix

It may be noted that the sales account that is coded as '811001' is credited as and when a sales transaction is recorded.

(c) Count : This function counts the number of records returned by a query. The number of times a sales transaction has occurred and recorded in books of accounts can be known by executing the following SQL statement.

```
SQL statement.
SELECT count (*)
FROM Vouchers
WHERE Credit = '811001'
```

In the above SQL statement, the Credit field stores the account code of sales when a sales transaction occurs. The WHERE clause restricts the number of records returned by the above SQL to those in which credit field has the account code of sales. Accordingly, the count () function returns the count value of records returned by the above SQL statement.

(d) First and Last : These functions are meant to retrieve the first and last record of a value set pertaining to a field or query expression.

## **A-3. Other Functions**

(a) IIF : The purpose of this function is to provide a value to the field from a mutually exclusive set of values. Its syntax is as given below :

IIIF (<Condition>, Value-1, Value-2)

Wherein <Condition> refers to any logical expression in which a comparison is made by using following comparison operators :

- = equal to
- <less than
- >greater than

<= less than or equal to

>= greater than or equal to

The condition formed by the above comparison operators is evaluated to result into TRUE or FALSE.

<Value-1> This value is returned by IIF() function to the field, if the condition turns out to be TRUE

<Value-2> This value is returned by IIF() function to the field, if the condition turns out to be FALSE

Example : Suppose a field Type is to return the string of characters "Debit" when its value is 0 and "Credit" when its value is 1, IIF() function is used as shown below :

IIF (Type = 0, "Debit", "Credit")

(b) Abs : The purpose of this function is to return absolute value, This function receives a numeric value as its input argument and returns an absolute value. Consider the following examples on use of Abs () function :

When – 84 is given as input argument to Abs(– 84), it returns 84 When 84 is given as input argument to Abs(84), it returns 84 (c) Val: The purpose of this function is to return the numbers contained in a string as a numeric value of appropriate type. Its Syntax is Val(string)

The string argument of the above Val() function is any valid string expression. The Val() function stops reading the string at the first character that cannot be recognised as number. For example, Val("12431") returns the value 12431 by converting the enclosed string of numerals into value. However, Val ("12,431") returns the numeric value 12 because comma after 12 in the enclosed string of characters in Val() function is not recognised as number.
